

Aluminum Garden Edging

When you need to separate materials
in the landscape, **Euroline "Slide" Garden Edging**
by **Europa Landscaping Products** is your solution!

ADVANTAGES:

- Telescopic connections easily joins pieces together without connectors, also allows off-cuts to be re-used.
- Complete with punch-outs for horizontal and vertical staking every 10.5", edging **will not come up with frost.**
- Very flexible, no problem for curves.
- Adjustable connections, no accurate measurement required for installation of final piece.
- Green product - eliminates waste, once installed, never needs replacing.
- Creates beautiful form for lawns

USES:

- Can be used in residential and commercial applications for :
lawns, gardens, gravel or mulch paths, concrete forming, sports field applications, artificial grass installations, asphalt bordering and riverstone/gravel bordering around foundations.
